

## Supplier Testimonial

At dnata catering, we pride ourselves on working with suppliers who share the same common values as we do; service excellence, safety and security, performance driven, respect and imagination.

In our quest to give recognition to these suppliers, we've launched a Strategic Supplier Partnership program and are proud to announce soma technology group as a worthy recipient of this title.

Having worked with soma technology group for many years, we have developed a long standing and positive working relationship. As one of Australia's leading IT business support companies, soma technology group fulfils our national IT requirements.

Providing expert knowledge and advice, combined with high quality products and services, soma technology group takes the time to understand our business, tailoring bespoke solutions that fulfil our requirements whilst continually monitoring our growing needs, to ensure our systems are robust and adaptable.

With operations based in the same cities as our company head office and catering units, combined and with a 24/7 hotline manned by expert staff, soma technology group ensures our business keeps running at all hours of the day or night. Providing great customer service and peace of mind, the pace at which the soma technology group team respond to, investigates and resolves any issues, is second to none.

Our recent national IT project proved that after many years of working together, soma technology group remains our best and most suitable supplier for all our IT requirements.

Delivering an unwavering amount of dedication and support to our business, soma technology group is invariably worthy of the recognition as a Strategic Supplier Partner.

We are proud to work with soma technology group now and into the future.
